Description

The OFN2121-A is a high performance industry standard 1x9 transceiver module that combines a fiber optic transmitter and receiver with an electrical subassembly. It operates with a single +3.3V power supply at a data rate of 155 Mb/s over multimode fiber for a link distance of 2 km.

Housed in a compact plastic package, the transceiver module consists of a transmitter and receiver optical subassembly coupled with duplex SC receptacle. The transceiver module operates at a nominal wavelength of 1310 nm for fast Ethernet, FDDI and ATM/SONET OC-3/SDH STM-1 short reach applications.

Safety

Laser Compliance Statement

The OFN2121-A is classified as a Class I LED Product and complies with IEC 60825-1 and FDA 21 CFR 1040.10 and 1040.11. The transceiver must be operated under recommended operating conditions. Because the transceiver is designed to be inherently eye safe, it does not require open fiber control thus eliminating complex electronics or mechanics.

Caution - use of device other than those specified herein may result in hazardous LED radiation exposure or other damage. Please embrace all customary precautions and discretion while handling this device.

Performance Specifications

Absolute Maximum Ratings

Stresses in excess of the absolute maximum ratings can cause damage to the optical device. Operations of the optical device are suggested to remain within the recommended operating conditions. Exposure to the absolute maximum ratings for extended periods can adversely affect device reliability.
